

ACCESS EQUIPMENT FOR POWER & PROCESS INDUSTRY

Specifications

- 1 Design according to:
 - NEN-EN-ISO-14122
 - Federal US OSHA requirements
- 2 World class design & manufacturing
- 3 Fencing, flooring, stair and fall protection according the latest safety standards
- 4 Modular design: dimensions and specifications upgradable and expandable with customer needs

Key benefits

- + Safe access to equipment.
- + Specific engineering expertise in strength analysis, structural loads, earthquake requirements, weld design and quality approval and other customer standards and procedures.
- + In-house project management to incorporate customer needs in the project, on time within budget.
- + Quick worldwide delivery in transportable units.
- + Global service network with local partners.
