# INTERIOR LIFT FOR PASSENGER SEATS

## Product Group 9025

Interior Lifts are specially designed to transport heavy interior items, such as passenger seats, into the aircraft or remove them easily from the aircraft. Optional feature of this lift is the ramp lift that goes all the way down to the ground.

### Key Benefits

- + Ramp lift that lowers to ground level to easily move heavy seats onto the lift platform
- + Developed for both narrow and wide body aircraft
- + Easy to adjust the height with hydraulic movement
- + Large working platform for simultaneously performing maintenance
- + Optimal fall protection by being completely surrounded by fences while performing maintenance
- + The stand fits both left and right side of the aircraft

### Features

- + Flexible railing system for fall protection and perfect fit to aircraft
- + Rubber padding to protect aircraft skin
- + Minimum footprint
- + For aircraft on wheels and jacked

### Specifications

#### Interior lift

- + Platform dimensions : approx. 2200 x 5000 mm
- + Max. height platform floor : 7000 mm
- + Min. height platform floor : 850 mm
- + Max load : max. 1000 kg
- + Product weight : approx. 5700 kg.

#### Optional: Ramp lift

- + Platform dimensions : 1600 x 2500 mm
- + Max. load : 500 kg

*Other platform dimensions and aircraft combinations upon request*
