CIVIL AND MILITARY HELICOPTER ACCESS PLATFORMS

NIJL Aircraft Docking developed fixed height and height adjustable access platforms for the maintenance of civil and military helicopters. The access platforms we design fit multiple helicopter types and we will meet all your requirements. Our product range contains:

- 1 Cockpit access platform
- 2 Fuselage access platform
- 3 Engine access platform
- 4 Rotor access platform
- 5 Tail rotor access platform
- 6 Tail access platform
- 7 Blade lifter
- 8 Blade dolly (to safely store blades)
- 9 Emergency ladder (to access the main areas, ladder fits most military helicopters)
- 10 Complete dock existing of separate mobile modules

Key Benefits

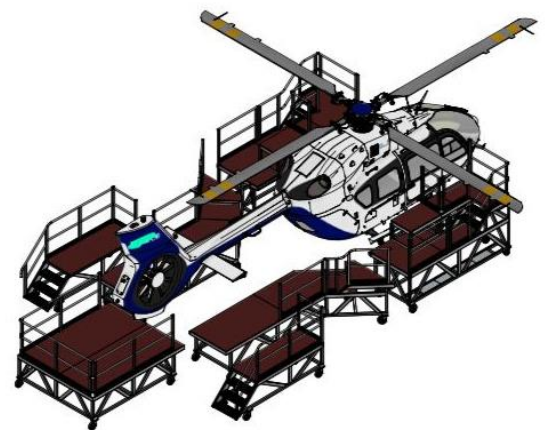

- + The platforms are made of aluminium for optimal stability and movability.
- + Fixed height, or height adjustable options.
- + The platforms have extendable / sliding floors and adjustable hand railings for a perfect fit.
- + All platforms are designed with small footprint.
- + For use in the hangar or on the apron.
- + All the military equipment is foldable to fit 20 ft freight containers.
