

# A350 (EIS) ACCESS STANDS

## Complete A350 Entry Into Service package of Access Stands for European A350 launching customer

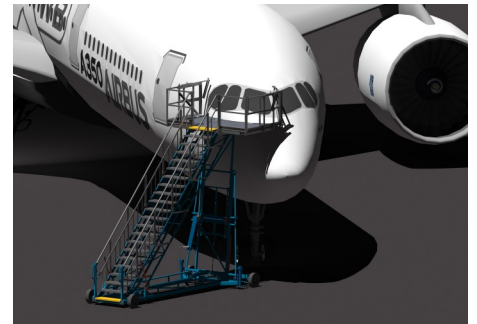

NIJL Aircraft Docking 2.0 is proud to announce the delivery of a full package access stands to the first airline in Europe to operate the A350 XWB.

With in-house engineering NIJL Aircraft Docking 2.0 offers a full service package from design up to delivery on site, commissioning and training.

With the advanced 3D scanner we were able to make detailed 3D aircraft scans before the A350 was launched to the airliner.

At the time the aircraft first arrived at the airport the A350 Stands had already been delivered to the hangar and could be fitted around the aircraft directly.

*“With the advanced 3D scanner we were able to make detailed 3D aircraft scans before the A350 was launched to the airliner.”*

Access Stands for A350

*PAX / Cockpit Window Stand*

*Cargo Door Stand*

### **Multifunctional**

Hangars are full of equipment. Lack of space is an issue. Therefore, NIJL steps, stands and docking systems are designed to cater for several aircraft types.

A number of the A350 Access Stands are available in combination with other aircraft types.

Hence, by using one piece of NIJL equipment, you can access several aircraft types. This means less equipment needed, and therefore lower cost.
